**TILLMAN COUNTY BID #4-2019
ROAD RECLAMATION & STABILIZATION – BASELINE ROAD**

GENERAL:

The Board of Tillman County Commissioners is soliciting bids for soil stabilization product and product application on approximately five miles of Baseline Road running East of Manitou, Oklahoma.

Bids must include all construction materials, equipment, and support staff. Bids must also include available start date.

Proof of current Liability and Workers Compensation insurance as well as an executed Affidavit of Non-Collusion must be included.

Tillman County reserves the right to accept or reject any and all bids and to award this bid in the best interest of Tillman County.

To schedule a site-visit, please contact Tillman County District 1 at 580-667-4145.

SPECIFICATIONS:

Soil Stabilization Product:

The stabilizer product shall be a concentrated liquid biocatalyst stabilizer formulated specifically for improving the stability of soils, select fill materials and aggregates-for use in construction of earthworks, subgrade, subbase, base course and for surface course materials used in construction and maintenance of unpaved roads, runways and other traffic surfaces.

The stabilizer shall be suitable for dilution in a water solution to allow for adequate dispersion of the liquid concentrate.

The stabilizer shall be non-hazardous, non-toxic, nonflammable, and non-corrosive.

The stabilizer product shall not be a byproduct or additive used primarily for dust control of road surfaces.

The stabilizer product shall be capable of being handled without the use of protective breathing apparatus or protective clothing.

A standard Materials Safety Data Sheet shall be furnished by the supplier.

Product Manufacturer's recommended application rate (diluted, per mile): _____

Total Stabilization Product Bid Price per Gallon: \$ _____

**TILLMAN COUNTY BID #4-2019
ROAD RECLAMATION & STABILIZATION – BASELINE ROAD**

Project Application:

Road shall be sampled from several areas throughout project distance to a depth of 8 inches. Samples should be sent to chosen chemical company's desired lab for analysis.

Product application shall be performed under weather conditions that allow for a minimum of three dry days after project is complete.

When weather conditions allow for required dry period, road shall be ripped to a depth of eight inches and disked until soil is evenly divided and any clumps are busted. After this is completed, a moisture reading should be taken.

The amount of water to be blended with product shall be determined based on the results of the moisture reading. The product should be applied via water truck at the recommend rate of the chosen chemical company.

Upon application, the road surface shall be disked or tilled to depth complete. A second moisture reading shall be taken. If the results of the moisture reading are not in the optimum range required for use of the product, then water shall be sprayed via water truck and then road shall be disked to bring the soil to required moisture content.

After desired moisture content is acquired, Tillman County District 1 will crown and compact the road surface.
